

CURRICULUM VITAE

EDWIN KIPROP

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Phone: +254 759 255 547

Email: edwinkiprop722@gmail.com

LinkedIn: [linkedin.com/in/edwinkiprop](https://www.linkedin.com/in/edwinkiprop)

GitHub: <https://github.com/kipropedwin178>

Portfolio: probros.name.ng

Location: Nandi, Kenya

PROFESSIONAL SUMMARY

Software Engineer and Physics graduate with hands-on experience building and deploying full-stack web applications. Skilled in React, Vite, JavaScript, Python, FastAPI, SQLAlchemy, PostgreSQL, REST APIs, JWT authentication, Git and GitHub.

Experienced in developing responsive user interfaces, backend APIs, database-driven systems, authentication systems and administrative functionality. Able to take projects from concept and interface design through development, testing and deployment.

Strong problem-solving, communication and leadership skills, with a practical, project-driven approach to software development and a commitment to continuous improvement.

TECHNICAL SKILLS

Frontend Development

- HTML5
- CSS3
- JavaScript (ES6+)
- React.js
- Vite
- React Router
- Bootstrap
- Axios
- Responsive Web Design

Backend Development

- Python
- FastAPI
- SQLAlchemy
- Pydantic
- RESTful APIs
- JWT Authentication

- Passlib
- Python-dotenv

Databases

- PostgreSQL
- SQLite
- SQLAlchemy ORM
- Relational Database Design
- CRUD Operations

Development Tools & Platforms

- Git
- GitHub
- Visual Studio Code
- Figma
- Swagger / OpenAPI
- npm
- Firebase
- Render

Additional Technical Skills

- Authentication and Authorization
- API Integration
- Frontend-Backend Integration
- Image Handling
- Environment Variables
- Debugging and Troubleshooting
- Production Deployment
- Security-conscious Development

SELECTED PROJECTS

1. Kentank Deliveries — Full-Stack Business Platform

Live Website: <https://kentankdeliveriesnumber.co.ke/>

- Built and deployed a full-stack platform for showcasing water tanks and managing business information.
- Developed the frontend using React, Vite, React Router, Bootstrap, Axios and custom CSS.
- Developed the backend using Python, FastAPI, SQLAlchemy and PostgreSQL.
- Designed and implemented RESTful API endpoints for communication between the frontend and backend.
- Implemented JWT-based administrator authentication and protected administrative operations.
- Implemented tank/product management functionality.
- Implemented product image management and frontend image display.
- Implemented contact-information management for business communication details.
- Integrated the React frontend with the production FastAPI backend.
- Configured environment-based API connectivity for development and production.

- Deployed the application and backend services to production.

Technologies: React, Vite, JavaScript, Bootstrap, Axios, Python, FastAPI, SQLAlchemy, PostgreSQL, JWT, Git, GitHub, Render.

2. Robinhood Advertising Network — Full-Stack Web Application

Live Website: <https://robinhood-advertising.onrender.com/>

- Developed a membership-based advertising and rewards platform.
- Built the frontend using React, Vite, React Router, Bootstrap and Axios.
- Developed backend REST APIs using Python, FastAPI and SQLAlchemy.
- Used PostgreSQL for persistent application data.
- Implemented user authentication and role-based access control.
- Implemented JWT-based authentication for protected backend operations.
- Developed membership management functionality.
- Implemented referral functionality and referral commissions.
- Implemented transaction and withdrawal functionality.
- Developed administrative functionality for managing platform operations.
- Structured the application with separate frontend, backend, database and service layers.
- Applied security-conscious development practices when handling authentication, authorization and sensitive application operations.

Technologies: React, Vite, JavaScript, Bootstrap, Axios, Python, FastAPI, SQLAlchemy, PostgreSQL, JWT, Pydantic, Passlib, Git and GitHub.

3. Food Recipe Search App

Live Website: <https://hotel-application-d76ed.web.app/>

- Built a food recipe search application that allows users to search for a specific food or dish.
- Implemented functionality that automatically retrieves and displays the corresponding recipe when a user searches for a food.
- Designed an intuitive and responsive interface for searching and viewing recipes.
- Integrated the application with a food/recipe data source to dynamically retrieve recipe information.
- Developed the application using React and JavaScript.
- Deployed the application using Firebase Hosting.

Technologies: React, JavaScript, HTML, CSS, API Integration, Firebase Hosting.

-

Technologies: React, JavaScript, Firebase, HTML, CSS, Firebase Hosting.

4. Financial Tracker App

Live Website: <https://finance-r.web.app/>

- Built a personal financial tracking application for managing income and expenses.
- Implemented structured financial summaries.
- Added visual charts to help users understand financial information.
- Designed a responsive and visually organized interface.
- Deployed the application using Firebase Hosting.

Technologies: React, JavaScript, Firebase, HTML, CSS.

5. Personal Portfolio Website

Portfolio: probro.name.ng

Designed and developed a personal portfolio website to showcase software development projects, skills and professional information.

- Built the interface using React and Vite.
- Designed responsive layouts for different screen sizes.
- Used the portfolio to present practical software development work and technical capabilities.

Technologies: React, Vite, JavaScript, HTML, CSS.

PROFESSIONAL EXPERIENCE

Freelance Software Developer / Web Developer

2023 – Present

- Design and develop responsive web applications for practical business and personal use cases.
 - Build modern frontend interfaces using React, JavaScript, HTML and CSS.
 - Develop backend systems and REST APIs using Python and FastAPI.
 - Design and manage relational databases using PostgreSQL and SQLAlchemy.
 - Implement authentication and authorization for protected applications.
 - Integrate frontend applications with backend APIs.
 - Deploy applications and troubleshoot frontend, backend, database and production configuration issues.
 - Work independently from project requirements and ideas through development, testing, deployment and refinement.
 - Build solutions based on practical business needs, with emphasis on usability, security and maintainability.
-

Technology & Community Leadership

- Support and mentor family members and peers in the use of technology and digital tools.
 - Share knowledge and assist others with technology-related challenges.
 - Demonstrate leadership, communication and problem-solving through practical technology projects.
 - Take initiative in learning new technologies and applying them through independent projects.
-

EDUCATION

Bachelor of Science in Physics

Meru University of Science and Technology
Graduated: 2024

Academic background provided a strong foundation in mathematics, analytical thinking, scientific problem-solving and quantitative reasoning.

Secondary Education

St. Paul's Chemalal Secondary School, Nandi
KCSE: 2019

Primary Education

Sosiot Primary School, Nandi
KCPE: 2015

PROFESSIONAL DEVELOPMENT & ADDITIONAL LEARNING

- Full-Stack Python Web Development
 - FastAPI and REST API Development
 - SQLAlchemy and PostgreSQL
 - JWT Authentication and Authorization
 - React.js and Modern Frontend Development
 - React Router and API Integration
 - Git and GitHub
 - Firebase Authentication and Firestore
 - Firebase Hosting
 - Swagger / OpenAPI
 - Web Application Deployment
 - Application Security Fundamentals
 - French Language — Beginner Level, self-study
-

LEADERSHIP & ACHIEVEMENTS

- Built and independently deployed complete full-stack web applications combining React, Python/FastAPI and PostgreSQL.
 - Progressed from frontend development into backend, database and API development through practical project work.
 - Successfully developed and deployed business-oriented web applications for real-world use cases.
 - Developed practical experience taking applications from initial concept through implementation and deployment.
 - Strong academic background in Physics, mathematics, analytical reasoning and problem-solving.
 - Demonstrated continuous self-directed learning through multiple independent software projects.
 - Experience working independently while managing the development lifecycle of personal and freelance projects.
-

LANGUAGES

- **English:** Fluent
 - **Kiswahili:** Fluent
 - **Kalenjin:** Fluent
 - **French:** Beginner (Currently Learning)
-

INTERESTS

- Software Development
 - Web Technologies
 - Coding and Programming
 - Football
 - Storytelling
 - Leadership
 - Writing
 - Continuous Learning
-
